

Product characteristics

- 1、Exquisite and small appearance design, classic and fashionable, easy to carry
- 2、High-definition video output, suitable for all kinds of display equipment
- 3、Strong PD fast charging function, have fun while charging at the same time
- 4、USB3.0 Port support big data peripheral product transmission
- 5、USB2.0 Port support connection to multiplexed peripherals
- 6、Support TF & SD dual card reading and writing function
- 7、Excellent device compatibility, Support TYPE-C GEN1、 GEN2 and Thunderbolt 3

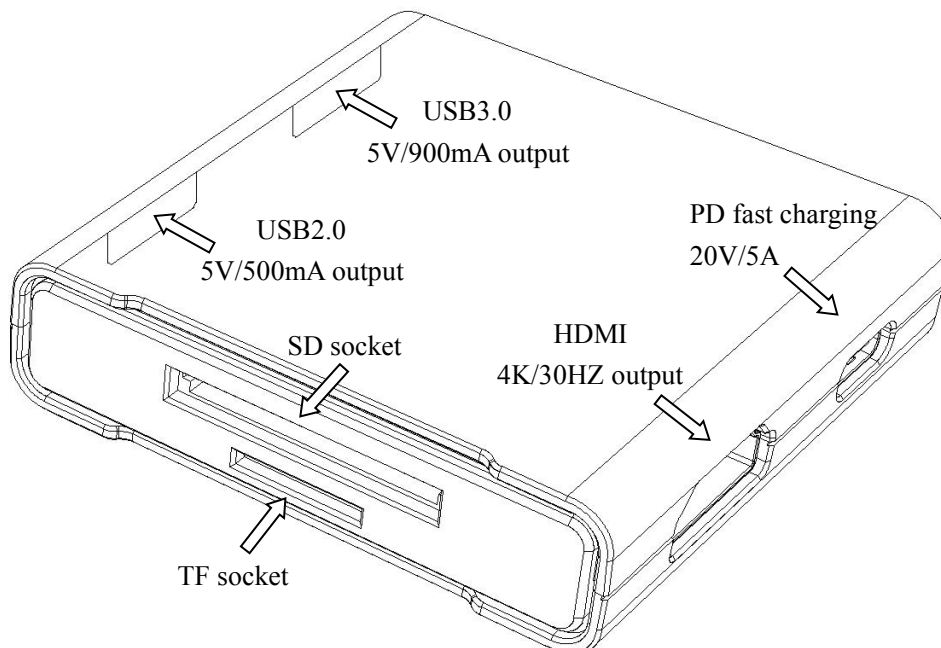

Technical parameter

- 1、Working voltage: $5\pm 0.5V$
- 2、Working current: $\leq 3A$
- 3、TYPE-C: Support for PD fast charging protocol
- 4、USB3.0: 1 port
- 5、USB2.0: 1 port
- 6、HDMI: 4K/30HZ
- 7、TF & SD: 1 socket
- 8、Cable: Connect to devices with TYPE-C interface (support for charging, data and DP ALT MODE)
- 9、Net weight: $35g\pm 10g$
- 10、Product size: $55*55*13.8mm\pm 1mm$

Installation steps

- 1、Take out the product and connect the end of the cable with type-c port to the computer
- 2、At this point, the computer will automatically install the driver. After the installation is completed, first connect the PD power supply, and then connect other kinds of devices to use normally.

Product interface specification

Warm Prompt

- 1、 Connection to host TYPE-C interface, need to support charging, data and DP ALT MODE function, otherwise can not convert all functions
- 2、 TF socket and SD socket can't be used at the same time
- 3、 External PD power supply requires the use of the original equipment equipped with the adaptive power supply, or use other power adapters that conform to the specifications
